

## **Technical Information**

# STF700 SmartLine Flange Mounted Level Specification 34-ST-03-103

#### Introduction

Part of the SmartLine® family of products, the STF700 is suitable for monitoring, control and data acquisition.

STF700 products feature piezoresistive sensor technology combining pressure sensing with on chip temperature compensation capabilities providing high accuracy, stability and performance over a wide range of application pressures and temperatures. The SmartLine family is also fully tested and compliant with Experion ® PKS providing the highest level of compatibility assurance and integration capabilities. SmartLine easily meets the most demanding application needs for pressure measurement applications.

#### **Best in Class Features:**

- Accuracies up to 0.05% standard
- Stability up to 0.02% of URL per year for ten years
- Automatic static pressure & temperature compensation
- Rangeability up to 100:1
- Response times as fast as 90ms
- Multiple local display capabilities
- External zero, span, & configuration capability
- Polarity insensitive electrical connections
- Comprehensive on-board diagnostic capabilities
- Integral Dual Seal design for highest safety based on ANSI/NFPA 70-202 and ANSI/ISA 12.27.0
- World class overpressure protection
- Full compliance to SIL 2/3 requirements.
- Modular design characteristics

Figure 1 – STF700 Flanged Level Transmitters feature fieldproven piezoresistive sensor technology

#### Span & Range Limits:

| Model  | URL        | LRL          | Max Span   | Min Span   |
|--------|------------|--------------|------------|------------|
|        | "H₂O       | "H₂O         | "H₂O       | "H₂O       |
|        | (mbar)     | (mbar)       | (mbar)     | (mbar)     |
| STF724 | 400 (1000) | -400 (-1000) | 400 (1000) | 4.0 (10.0) |
| STF72F | 400 (1000) | -400 (-1000) | 400 (1000) | 4.0 (10.0) |
| Model  | psi (bar)  | psi (bar)    | psi (bar)  | psi (bar)  |
| STF732 | 100 (7.0)  | -100 (-7.0)  | 100 (7.0)  | 1 (0.07)   |
| STF73F | 100 (7.0)  | -100 (-7.0)  | 100 (7.0)  | 1 (0.07)   |

#### **Communications/Output Options:**

- 4-20mA dc
- Honeywell Digitally Enhanced (DE)
- HART<sup>®</sup> (version 7.0)
- FOUNDATION™ Fieldbus

All transmitters are available with the above listed communications protocols.

## **Description**

The SmartLine family pressure transmitters are designed around a high performance piezo-resistive sensor. This one sensor actually integrates multiple sensors linking process pressure measurement with on-board static pressure (DP Models) and temperature compensation measurements. This level of performance allows the ST 700 to replace most competitive transmitters available today.

#### **Indication/Display Option**

The ST 700 modular design accommodates a basic alphanumeric LCD display.

#### **Basic Alphanumeric LCD Display Features**

- o Modular (may be added or removed in the field)
- o 0, 90,180, & 270 degree position adjustments
- Configurable (HART only) and standard (Pa, KPa, MPa, KGcm2, Torr, ATM, inH<sub>2</sub>O, mH<sub>2</sub>O, bar, mbar, inH<sub>2</sub>O, inHG, FTH<sub>2</sub>O, mmH<sub>2</sub>O, mm HG, & psi) measurement units
- o 2 Lines 16 Characters (4.13H x 1.83W mm)
- Square root output indication  $(\sqrt{})$

#### Simple LCD Display Features

- Modular (may be added or removed in the field)
- Supports HART protocol variant
- o 0, 90,180, & 270 degree position adjustments
- Configurable (HART only) and standard (Pa, KPa, MPa, KGcm2, Torr, ATM, inH<sub>2</sub>O, mH<sub>2</sub>O, bar, mbar, inH<sub>2</sub>O, inHG, FTH<sub>2</sub>O, mmH<sub>2</sub>O, mm HG, & psi) measurement units.
- o Supports Flow engineering units
- 2 Lines 6 digits PV (9.95H x 4.20W mm) 8 Characters
- Square root output indication (√) and Write protect Indication
- Built in Basic Device Configuration through Internal Buttons – Range/Engineering Unit/Loop Test /Loop Calibration/Zero /Span Setting

## **Diagnostics**

SmartLine transmitters all offer digitally accessible diagnostics which aid in providing advanced warning of possible failure events minimizing unplanned shutdowns, providing **lower overall operational costs** 

## **System Integration**

- SmartLine communications protocols all meet the most current published standards for HART/DE/Fieldbus.
- Integration with Honeywell's Experion PKS offers the following unique advantages.
  - Tamper reporting
  - o FDM Plant Area Views with Health summaries
  - All ST 700 units are Experion tested to provide the highest level of compatibility assurance

#### **Configuration Tools**

#### **External Three Button Configuration Option**

Suitable for all electrical and environmental requirements, SmartLine offers the ability to configure the transmitter and display via three externally accessible buttons when a display option is selected. Zero/span capabilities are also optionally available via these buttons with or without selection of the display option.

#### **Internal Two Button Configuration Option**

The Simple display has two buttons that can be used for Basic configuration such as re ranging, PV Engineering unit setting, Zero/Span settings and Loop testing and calibration functions.

#### **Hand Held Configuration**

SmartLine transmitters feature two-way communication and configuration capability between the operator and the transmitter. This is accomplished via Honeywell's field-rated Multiple Communication Configurator (MCT404).

The MCT404 is capable of field configuring DE and HART Devices and can also be ordered for use in intrinsically safe.

Devices and can also be ordered for use in intrinsically safe environments. All Honeywell transmitters are designed and tested for compliance with the offered communication protocols and are designed to operate with any properly validated hand held configuration device.

#### **Personal Computer Configuration**

Honeywell's SCT 3000 Configuration Toolkit provides an easy way to configure Digitally Enhanced (DE) instruments using a personal computer as the configuration interface. Field Device Manager (FDM) Software and FDM Express are also available for managing HART & Fieldbus device configurations.

#### **Modular Design**

To help contain maintenance & inventory costs, all ST 700 transmitters are modular in design supporting the user's ability to replace meter bodies, add indicators or change electronic modules without affecting overall performance or approval body certifications. Each meter body is uniquely characterized to provide in-tolerance performance over a wide range of application variations in temperature and pressure and due to the Honeywell advanced interface, electronic modules may be swapped with any electronics module without losing in-tolerance performance characteristics.

#### **Modular Features**

- Meter body replacement
- Exchange/replace electronics/comms modules\*
- Add or remove integral indicator\*
- Add or remove lightning protection (terminal connection)\*

  \* Field replaceable in all electrical environments (including IS) except flameproof without violating agency approvals.

With no performance effects, Honeywell's unique modularity results in *lower inventory needs and lower overall operating costs*.

## **Performance Specifications**

Reference Accuracy (conformance to +/-3 Sigma)

Table 1

| Model  | URL                              | LRL                                | Min Span                       | Maximum<br>Turndown<br>Ratio | Stability<br>(%URL/Year<br>for ten<br>years) | Reference<br>Accuracy <sup>1,2</sup><br>(% Span) |

| •      |                                    | Turn Down Effect  |             |                 | Temp                    | Effect                   | Static                     | Effect                         |       |
|        |                                    | $ \pm \left[ A + B \left( \frac{C}{Span} \right) \right] $ % Span |             |                 |                         | URL   Span   28°C (50°F) | $\pm \left[ F + G \right]$ | URL<br>Span )]<br>er 300 psi   |       |

## Total Performance (% of Span):

Total Performance = +/-  $\sqrt{(Accuracy)^2 + (Temp Effect)^2 + (Static Line Pressure Effect)^2}$ 

Total Performance Examples: (5:1 Turndown, up to 50 °F shift & up to 300 psi Static Pressure)

 STF724 @ 80" H<sub>2</sub>O: 0.485% of span
 STF732 @ 20 psi: 0.475 % of span

 STF72F @ 80" H<sub>2</sub>O: 0.166% of span
 STF73F@ 20 psi: 0.137% of span

## **Typical Calibration Frequency:**

Calibration verification is recommended every two (2) years

## Notes:

- 1. Terminal Based Accuracy Includes effects of linearity, hysteresis and repeatability. Analog output adds 0.005% of span
- 2. For zero based spans and reference conditions of  $25^{\circ}$ C, 0 psig static pressure, 10 to 55% RH.

<sup>&</sup>lt;sup>4</sup> Ambient Temperature for DN PN40 is –10 to 50°C [14 to 122 F]

 $<sup>^2</sup>$  For CTFE fill fluid, the maximum temperature rating is 150  $^{\circ}\text{C}$  (300  $^{\circ}\text{F})$ 

<sup>&</sup>lt;sup>3</sup> Short term equals 2 hours at 70°C (158 °F)

<sup>&</sup>lt;sup>5</sup> MAWP applies for temperature range -40 to 125°C. However, Static Pressure Limit is de-rated to 3,000 psi from -26°C to -40°C. Use of graphite o-rings de-rates transmitter to 3,625 psi. Use of adaptor with graphite o-rings de-rates transmitter to 3,000 psi.

<sup>&</sup>lt;sup>6</sup> Consult factory for MAWP of ST 800 transmitters with CSA approval.

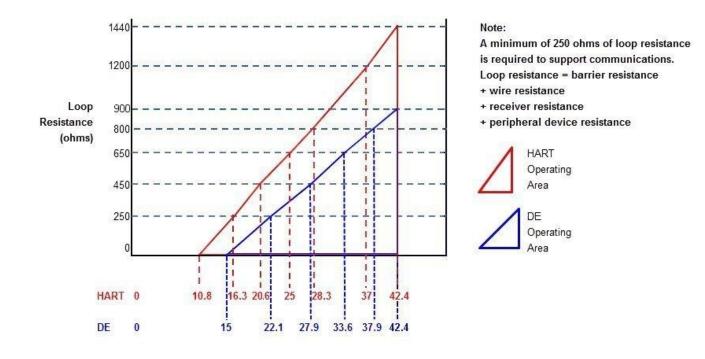

Figure 2 - Supply voltage and loop resistance chart & calculations

## **Performance Under Rated Conditions – All Models**

For DE, Rlmax = 35\* (Power Supply Voltage-15)
For HART, Rlmax = 45.6\* (Power Supply Voltage-10.8)

| Parameter   | Description                          |  |                                    |                                    |  |  |  |

Materials Specifications (see model selection guide for availability/restrictions with various models)

| Parameter                              | Description  |
|--|--|
| Barrier Diaphragms Material            | 316L SS, Hastelloy® C-276 <sup>2</sup> , Monel® 400 **3  |
| Process Head Material                  | 316 SS <sup>4</sup> , Carbon Steel (Zinc-plated) <sup>5</sup> , Hastelloy C-276* <sup>6</sup> , Monel 400 ** <sup>7</sup>  |
| Vent/Drain Valves & Plugs <sup>1</sup> | 316 SS <sup>4</sup> , Hastelloy C-276 <sup>2</sup> , Monel 400 <sup>7</sup>  |
| Gasket Ring Material (Wetted)          | 316/316L SS, Hastelloy® C-276*2, Monel®400**3  |
| Extension Tube Material                | 316 SS⁴  |
| Head Gaskets                           | Glass-filled PTFE standard. Viton® and graphite are optional.  |
| Meter Body Bolting                     | Carbon Steel (Zinc plated) standard. Options include 316 SS, NACE A286 SS bolts, Monel K500, Super Duplex and B7M.   |
| Optional Adapter Flange and Bolts      | Adapter Flange materials include 316 SS <sup>4</sup> , Hastelloy C-276 <sup>6</sup> and Monel 400 <sup>7</sup> . Bolt material for flanges is dependent on process head bolts material chosen. Standard adaptor seal material is glass-filled PTFE. Viton and graphite are optional. |
| Mounting Flange                        | Flush or Extended Diaphragm:   |
| STF724, STF732                         | Zinc Chromate plated Carbon Steel <sup>5</sup> , 304 SS, or 316 SS <sup>4</sup> .  |
| STF72F, STF73F                         | 316L SS (NOTE: Mounting Flange is process wetted.)   |
| Fill Fluid                             | Silicone 200, CTFE, NEOBEE M-20 or Silicone 704  |
| Electronic Housing                     | Pure Polyester Powder Coated Low Copper (<0.4%)-Aluminum. Meets NEMA 4X, IP66, & P67. All stainless steel housing is optional.   |
| Mounting                               | See Figure 3 for typical flange mounting arrangement.  |
| Process Connections                    |  |
| All Models                             | Process Head: 1/4-inch NPT; 1/2-inch NPT with adapter and DIN, standard options.   |
| STF724, STF732                         | Flange: 2, 3 or 4-inch Class 150 or 300 ANSI; DN50-PN40, DN80-PN40 or DN100-PN40 DIN flange.  Extended Diaphragm: 2, 4, or 6 inches (50, 101, 152 mm) long.  |
| STF72F, STF73F                         | 2 or 3-inch, Class 150 ANSI flange.  |
| Wiring                                 | Accepts up to 16 AWG (1.5 mm diameter).  |
| Dimensions                             | See Figure 4, Figure 5 & Figure 6  |
| Net Weight                             | STF72F, STF73F:14-19 pounds (6.4 - 8.7Kg) with Aluminum Housing  |
|  | STF728, STF732: 18-32 pounds (8.2 - 14.5Kg) with Aluminum Housing  |

<sup>&</sup>lt;sup>1</sup> Vent/Drains are sealed with Teflon®

<sup>&</sup>lt;sup>2</sup> Hastelloy C-276 or UNS N10276

<sup>&</sup>lt;sup>3</sup> Monel 400 or UNS N04400

<sup>&</sup>lt;sup>4</sup> Supplied as 316 SS or as Grade CF8M, the casting equivalent of 316 SS.

<sup>&</sup>lt;sup>5</sup> Carbon Steel heads are zinc-plated and not recommended for water service due to hydrogen migration. For that service, use 316 stainless steel wetted Process Heads.

<sup>&</sup>lt;sup>6</sup> Hastelloy C-276 or UNS N10276. Supplied as indicated or as Grade CW12MW, the casting equivalent of Hastelloy C-276

<sup>&</sup>lt;sup>7</sup> Monel 400 or UNS N04400. Supplied as indicated or as Grade M30C, the casting equivalent of Monel 400

<sup>\*</sup> Flush design only.

<sup>\*\*</sup>Flush or pseudo flange design.

## **Communications Protocols & Diagnostics**

#### **HART Protocol**

#### Version:

HART 7

#### **Power Supply**

Voltage: 10.8 to 42.4Vdc at terminals Load: Maximum 1440 ohms See Figure 2.

Minimum Load: 0 ohms. (For handheld communications a

minimum load of 250 ohms is required)

#### Foundation Fieldbus (FF)

#### **Power Supply Requirements**

Voltage: 9.0 to 32.0Vdc at terminals Steady State Current: 17.6mAdc Software Download Current: 27.4mAdc

#### **Available Function Blocks**

| Block Type       | Qty | Execution Time |
|------------------|-----|----------------|
| Resource         | 1   | n/a            |
| Transducer       | 1   | n/a            |
| Diagnostic       | 1   | n/a            |
| Analog Input     | 1*  | 30 ms          |
| PID w/Autotune   | 1   | 45 ms          |
| Integrator       | 1   | 30 ms          |
| Signal Char (SC) | 1   | 30 ms          |
| LCD Display      | 1   | n/a            |
| Flow Block       | 1   | 30 ms          |
| Input Selector   | 1   | 30 ms          |
| Arithmetic       | 1   | 30 ms          |

<sup>\*</sup> Al block may have two (2) additional instantiations.
All available function blocks adhere to FOUNDATION
Fieldbus standards. PID blocks support ideal & robust PID
algorithms with full implementation of Auto-tuning.

#### **Link Active Scheduler**

Transmitters can perform as a backup Link Active Scheduler and take over when the host is disconnected. Acting as a LAS, the device ensures scheduled data transfers typically used for the regular, cyclic transfer of control loop data between devices on the Fieldbus.

#### **Number of Devices/Segment**

Entity IS model: 6 devices/segment

#### **Schedule Entries**

18 maximum schedule entries

Number of VCR's: 24 max

Compliance Testing: Tested according to ITK 6.0.1

#### **Software Download**

Utilizes Class-3 of the Common Software Download procedure as per FF-883 which allows the field devices of any manufacturer to receive software upgrades from any host.

#### **Honeywell Digitally Enhanced (DE)**

DE is a Honeywell proprietary protocol which provides digital communications between Honeywell DE enabled field devices and Hosts.

#### **Power Supply**

Voltage: 10.8 to 42.4Vdc at terminals Load: Maximum 1440 ohms See Figure 2.

#### **Standard Diagnostics**

ST 700 top level diagnostics are reported as either critical or non-critical and readable via the DD/DTM tools or integral display as shown below.

#### **Critical Diagnostics**

| HART DD/DTM Tools                 | Basic Display            | Simple Display |
|-----------------------------------|--------------------------|----------------|
| Electronic Module<br>DAC Failure  | Electronics module fault | Fault Comm El  |
| Meter Body NVM<br>Corrupt         | Meter Body fault         | Fault Mtrbody  |
| Config. Data Corrupt              | Electronics module fault | Fault Comm El  |
| Electronic Module<br>Diag Failure | Electronics module fault | Fault Comm El  |
| Meter Body Critical<br>Failure    | Meter Body fault         | Fault Mtrbody  |
| Sensor Comms<br>Timeout           | Meter Body Comm fault    | Fault Mbd Com  |

## **Non-Critical Diagnostics**

| HART DD/DTM Tools                   |
|-------------------------------------|
| Display Failure                     |
| Electronic Module Comm Failure      |
| Meter Body Excess Correct           |
| Sensor Over Temperature             |
| Fixed Current Mode                  |
| PV Out of Range                     |
| No Factory Calibration              |
| No DAC Compensation                 |
| LRV Set Error – Zero Config. Button |
| URV Set Error – Zero Config. Button |
| AO Out of Range                     |
| Loop Current Noise                  |
| Meter Body Unreliable Comm          |
| Tamper Alarm,                       |
| No DAC Calibration                  |
| Sensor Supply Voltage Low           |

Refer to ST 700 manuals for additional level diagnostic information.

## **Approval Certifications:**

#### Notes:

1. Operating Parameters:

- 2. Intrinsically Safe Entity Parameters
  - a. Analog/ DE/ HART Entity Values:

Transmitter with Terminal Block Revision E or Later

Note: Transmitter with Terminal Block Revision E or later

The revision is on the label that is on the module. There will be two lines of text on the label:

- First is the Module Part #: 50049839-001 or 50049839-002
  - Second line has the supplier information, along with the REVISION:

XXXXXXX-EXXXX, THE "X" is production related, THE POSITION of the "E" IS THE REVISION.

b. Foundation Fieldbus- Entity Values

Transmitter with Terminal Block Revision F or Later

FISCO Field Device Imax = Ii = 380 mA Ci = 0nF Li = 0 Pi = 5.32 W

Vmax= Ui = 17.5V

Note: Transmitter with Terminal Block Revision F or later

The revision is on the label that is on the module. There will be two lines of text on the label:

- First is the Module Part #: 50049839-003 or 50049839-004
- Second line has the supplier information, along with the REVISION:

XXXXXXX-EXXXX, THE "X" is production related, THE POSITION of the "E" IS THE REVISION.

#### **Approval Certifications: (Continued)**

| Approvai Certification | ono. (Continued)  |
|------------------------|---|
| Marine Certificates    | This certificate defines the certifications covered for the ST 800 Pressure Transmitter family of products, including the SMV 800 Smart Multivariable Transmitter. It represents the compilation of the five certificates Honeywell currently has covering the certification of these products into marine applications.  For SmartLine Pressure Transmitter and SMV800 Smart Multivarible Transmitter  American Bureau of Shipping (ABS) - 2009 Steel Vessel Rules 1-1-4/3.7, 4-6-2/5.15, 4-8-3/13 & 13.5, 4-8-4/27.5.1, 4-9-7/13. Certificate number: 04-HS417416-PDA  Bureau Veritas (BV) - Product Code: 389:1H. Certificate number: 12660/B0 BV  Det Norske Veritas (DNV) - Location Classes: Temperature D, Humidity B, Vibration A, EMC B, Enclosure C. For salt spray exposure; enclosure of 316 SST or 2-part epoxy protection with 316 SST bolts to be applied. Certificate number: A-11476  Korean Register of Shipping (KR) - Certificate number: LOX17743-AE001  Lloyd's Register (LR) - Certificate number: 02/60001(E1) & (E2) |
| 011 010 0 1111 11      |   |
| SIL 2/3 Certification  | IEC 61508 SIL 2 for non-redundant use and SIL 3 for redundant use according to EXIDA and TÜV Nord Sys Tec GmbH & Co. KG under the following standards: IEC61508-1: 2010; IEC 61508-2: 2010; IEC61508-3: 2010.   |

Model Selection Guide 34-ST-16-103 Issue 12

#### Instructions

- Select the desired Key Number. The arrow to the right marks the selection available.
- Make one selection from each Table (I, II and IX) using the column below the proper arrow.
- A(●) denotes unrestricted availability. Aletter denotes restricted availability.
- Restrictions follow Table IX.

| Key Number | I | II | Ш | IV | V | VI | VII | VIII |   | IX   |

Carbon Steel heads are zinc-plated and not recommended for water service due to hydrogen migration. For that service, use the 316 stainless steel Wetted Reference Head.

Vent/Drains are Teflon or PTFE coated for lubricity.

Vent/Drains are Terion of PTE coated for hubits.

Hastellov® C-276 or UNS N10276

Supplied as 316 SS or as Grade CF8M, the casting equivalent of 316 SS.

Supplied as indicated or as Grade CW12MW, the casting equivalent of Hastellov® C-276

Except Carbon Steel Heads shall use 316SS Vent/Drain, Plugs & Adapters when required
